Dedicated and proactive Frontend Developer with hands-on experience in Angular, Next.js, and React.js. Adept at creating dynamic, responsive user interfaces and integrating RESTful APIs using Spring Boot and PostgreSQL. Proven ability to translate Figma designs into high-quality UIs and collaborate effectively within development teams using GitLab for version control and CI/CD. Strong problem-solving skills and a commitment to continuous learning, demonstrated through successful internships and personal projects. Eager to leverage technical skills and innovative thinking to contribute to a forward-thinking development team.

SKILLS

- **Frontend Development:** Proficient in HTML, CSS, and JavaScript, with a focus on creating responsive and user-friendly interfaces.
- **Backend Development:** Familiar with Java, Python, and C# for backend development and general programming.
- **Database Management:** Experience in PostgreSQL and MySQL, ensuring efficient data handling and storage.
- **Cloud Computing:** Knowledgeable in AWS, adept at deploying and managing applications in cloud environments.
- **Frameworks:** Familiarity with Angular and Node.js for dynamic web development.
- **Learning Abilities:** Strong commitment to continuous learning, demonstrated through rapid acquisition of new skills and technologies.
- **Problem-solving:** Proven ability to analyze complex problems and develop effective solutions.
- **Communication:** Clear and effective communication skills, adept at conveying technical concepts to both technical and non-technical audiences.

EXPERIENCE

BStarSolutions - Web Developer Intern

May 2024 – Aug 2024

- **Angular Development:** Developed and maintained web applications using Angular, focusing on creating dynamic and responsive user interfaces. Worked on specific modules and features, tackling challenges such as state management and component communication.
- **RESTful API Integration:** Designed and integrated RESTful APIs using Spring Boot, facilitating seamless data exchange between the front-end and back-end systems. Connected APIs with PostgreSQL for robust data management.
- **Next.js and Keycloak Integration:** Utilized Next.js and React.js to build dynamic web applications, including pages for all stores of QSR Vietnam. Integrated Keycloak for authentication and authorization, ensuring secure access to the applications.

- **UI Development from Figma Designs:** Translated Figma design prototypes into responsive and visually appealing user interfaces. Developed the Staff Effort Report UI, part of a larger product for the company, ensuring a high-quality user experience.
- **Version Control with GitLab:** Collaborated with the development team using GitLab for version control, issue tracking, and CI/CD. Managed branches, conducted code reviews, and implemented CI/CD pipelines to streamline development processes.
- **Team Collaboration:** Worked within a team, contributing to project planning and execution. Communicated effectively with team members, utilizing tools such as Teams, and Open Project for task management and coordination.
- **Learning and Growth:** Gained new skills in RESTful API development with Spring Boot, PostgreSQL integration, and advanced UI development with Next.js and React.js. Received positive feedback for proactive problem-solving and delivering high-quality work within deadlines

EDUCATION

Ontario College Advanced Diploma of Computer Programming and Analysis Jan 2024 - May 2025
Durham College

PROJECTS

- **Bank Management** (<https://github.com/thwhxx/BankManagement>)
This solution is part of the Bank Management project, a .NET application designed to manage banking transactions and accounts. It includes features such as account balance checks, deposits, withdrawals, and transfers.
- **Record Searching, Displaying File Upload and Password Update**
(<https://github.com/thwhxx/INFT2100-Lab-3-Record-Se...>)
This lab focuses on enhancing your web application with the following features: record searching and displaying, file upload functionality, and password updates. You will integrate these features into your existing web application.
- **JS Connect** (<https://github.com/thwhxx/INFT2202-ICE3>)
JSConnect is a dynamic web application developed using JavaScript, designed to facilitate seamless contact management, user login, and registration functionalities. With JSConnect, users can effortlessly manage their contacts, securely log in to their accounts, and register for new accounts with ease. Leveraging JavaScript's versatility, this project offers a user-friendly interface and robust backend functionality, ensuring a smooth and efficient user experience.
